2. For the reasons given in the M/1-2(CS) letter, the P. H. Engr to Govt states that for the execution of Nipani Water Supply scheme costing Rs 13,57,934, it is quite necessary to have a Sub-divisional office at Nipani. It is stated that this scheme cannot be ~~taken~~ entrusted to any other Sub-division. The P. H. E. accordingly requests that a new temp Sub-division viz the Southern Sanitary Sub-division (in the Southern P. H. Works Dn, Kolhapur) with head quarters at Nipani may be sanctioned for a period of 3 years.

3. In the P. H. circle there are 6 Divisions and 29 sub-divisions. In the Southern P. H. works Dn, which will consist the proposed Sub-division has 3 sub-divisions. In the case of the Special Survey Sub-division for

2017/48

for carrying out the detailed survey in the Bhalavel Nalkanda tracts of the A'bad Dn, the T.P.C. suggested that the proposed sub-division should be formed by retrenching either a whole sub-division or the requisite number of individual posts. In view of this, it is unlikely that the proposal for the formation of the Southern Sanitary Sub-division, Vijapur will be considered favourably by the T.D. The P.H.E may accordingly be addressed on the lines of G.L No 9/48 E-B(III), dt the 19-1-50 as per draft put up for approval.

FINANCE DEPARTMENT
B
Diary Serial No 22-2-50

(5-7-51)

4/8/1950

U.O.R. to the F.D., dated the 21 Feb. 1950.

Finance Department (B)

The P.W.D. has supported on thse pp. a proposal to sanction a sub-divisional office at Nipani for the execution of Nipani Water Supply Scheme. It is stated that in addition to the execution of Nipani Water Supply Scheme the proposed sub division will be entrusted with the work of investigation and preparation of detailed projects for Kolhapur Water Supply distribution system and underground drainage scheme for Kolhapur. It is also stated that the staff required for the proposed sub division cannot be made available from the existing staff in the Public Health Circle.

2. The staff proposed for the sub division is as follows:-

1 Dy. Engineer
5 Overseers
3 Sub-Overseers
1 Asstt. Draftsman
3 Tracers
2 Computors
1 Sr. clerk
3 Jr. clerks
4 Peons
1 Chowkidar

The staff to be sanctioned for a sub-division depends upon the size of the sub-division. Since in the present case the P.W.D. is apparently satisfied as to the necessity of all the staff proposed and since it is proposed to ask the P.H.E. to employ the staff only when actually required, F.D. may agree to the staff for a period of one year in the first instance.

3....

3. The annual average cost involved in the proposal is said to be about Rs.32,000/-.

4. It is necessary to obtain the approval of the E.P.C before the Purs. proposal is agreed to. There after may therefore be circulated to E.P.C for its approval. After E.P.C accords its approval, the expdre in question, will have to be met by means of a supplementary grant. The Govt may, in that case, be required to forward immediately a supplementary demand statement for being placed before the S & A at its current session.

No. 13088 of 1949.

Poona:dated: 20th :December:1949.

To

The Secretary to Government,
Public Works Department,Bombay.

Subject:- Creation of a new Temporary Sub Division viz. "The Southern Sanitary Sub Division" with headquarters at Nipani, under the Executive Engineer,Southern Public Health Works Diyision,Kolhapur.

Reference:Government Resolution, P.W.D. No.5124/36, ~~date~~ dated 24th November 1949, according technical sanction to the Nipani Water Supply project.

2. The Nipani water supply project is estimated to cost Rs. 13,57,934/- . The execution of this Scheme will spread over a period of at least 3 years. For undertaking a Scheme of this magnitude it is quite necessary to have a Sub Divisional Office located at Nipani . These works cannot be entrusted to any other Sub Division, as the town of Nipani is not easily accessible by rail. Government will also recover from the Local body Establishment charges as 23% of the net cost and this will amount Rs. 2,77,909/-.

3. In addition to the execution of the Nipani Water Supply Scheme, the work of investigation and preparation of detailed projects for Kolhapur Water Supply distribution system and underground drainage Scheme for Kolhapur are also proposed to be entrusted to this Sub Division. In this connection reference is also invited to this office No.S.W.3/29/8264, dated 11-8-1949, forwarding my inspection note on Kolhapur Water Supply, which deals at length on the existing water works at Kolhapur and further improvements contemplated thereto in future.

4. The Kolhapur Water Works which have recently been executed at a cost of over Rs. 30 lakhs are owned by Government. The distribution system in the city area including the Municipal limits is also under the Govern--ment control as revenue for distribution of water is collected direct by Government as in Poona Cantonment and Suburban areas. As has been pointed out in my inspection note, the existing distribution system is very defective and does not cover the whole area which the water works are intended to serve. The Executive Engineer, Southern Public Health Works Division reports that no provision for a proper distribution system was made in the sanctioned scheme for Water Supply to Kolhapur. This omission was noticed by him in 1947 and brought to the notice of the authorities concerned. Though the necessity for this Scheme was admitted by all, it was not sanctioned in time, as it was thought that inclusion of this in the main scheme would result in delay in execution of the main Water Supply Scheme. Now the Water Works are ready and are capable of supplying sufficient water for the present needs of the town. But the advantage of it is not derived by all citizens for ~~water~~ want of a proper distribution system.Several complaints are often being received in this office regarding shortage or improper distribution of water. This is also resulting in a loss of revenue to Government.

5. The distribution system is estimated to cost approx--imately Rs. 15 lakhs. Before undertaking preparation of detailed project for this scheme, it is necessary to take a contour survey of the whole area of Kolhapur city and

....page 2 (P.T.O.)

city and suburban which covers an area of about 25 Sq. miles. The survey now made will also be helpful to - draw up the underground drainage Scheme, which work - has already been entrusted to this circle by the Kolha--pur Municipality.

6. In order therefore to enable the above works all of which are urgent being carried out efficiently and in time it is requested that Government sanction may - kindly be accorded to the creation of a temporary Sub Division with headquarters at Nipani and the following staff sanctioned therefore for a period of 3 years in the first instance :-

1. One Dy. Engineer, B.S.E. Class II.
2. Five overseers, B.S.Es.
3. Three Sub Overseers 70-3-85-4-105-5-145.
4. One Assistant Draftsman 70-3-85-4-105.
5. Three Tracers 46-3-85-4-105.
6. Two computors -- do ---
7. One Senior Clerk 92-8-140.
8. Three Junior Clerks 46-3-85-4-105.
9. Four Peons. 30-1/2-35
10. One Chowkidar. — do —

The Survey work at Kolhapur can conveniently be supervised by the Sub Divisional Officer at Nipani as it is within easy reach i.e. at only a distance of about 20 miles from Nipani.

VERY URGENT. No. 1346 of 1950.

Poona 1, 8/14 February 1950.

To

The Secretary to Government,
Public Works Department, Bombay.

Subject :- Creation of a new temporary sub-division viz. the Southern Sanitary Sub-Division, Nipani in the Southern Public Health Works Division.

Reference - Government letter, Public Works Department No.2017/48-E(III), dated the 20th January 1950. pp 3-4

2. Though the expansion of the Public Health Circle has been extensive during last few years, it cannot in any way be said to be disproportionate, since many new works of a great magnitude both of Government as well as those of local bodies are undertaken by this Circle with the sanction of Government. Merger of States and consequent taking over of State-owned works, has considerably added to it, and two new Divisional Offices viz. the Public Health Works Division, North Gujarath, Baroda with 5 sub-divisions and the Southern Public Health Works Division, Kolhapur, had to be opened for properly discharging the liabilities involved upon Government, consequent upon the merger of the Baroda and Kolhapur States. Besides this, two sub-divisions under me viz. the Miraj Sanitary Sub-Division and the North Gujarath Sanitary Sub-Division, are mainly intended for execution & M. & R. of smaller State-owned works in the Deccan and Gujarat. The other Divisional and sub-divisional offices have been opened, having due regard to the importance and magnitude of works at the headquarters of Divisional and Sub-Divisional offices and none of these offices can be abruptly closed unless the works on hand are completed in all respects. As each of the Divisional and Sub-Divisional offices have been provided with minimum strength required and many of them are even now pressing me for approaching Government for additional staff, the question of reducing the posts in any of the offices appears also to be difficult problem.

3. It is, therefore, requested that the opening of the Southern Sanitary Sub-Division at Nipani, may not be entangled with the general question of the reconstitution of Public Works Department, and be thus delayed, as this sub-division is intended for execution of the Nipani water supply scheme, which is estimated to cost Rs.13,57,934/-, and also for preparation of Kolhapur water supply - Improvements to distribution system - which is estimated to cost approximately Rs. 15 lakhs. Both these schemes are Deposit Contribution works and Government is amply recompensated towards the cost of the establishment of the sub-division by the levy of 23% Establishment charges for execution of works at Nipani and by the way of 2½% preparation charges for preparation of the distribution scheme for Kolhapur, which would approximately amount to more than Rs. 3 lakhs - Rs.2,77,909/- in the case of the former and Rs.37,500/- in the case of the latter. The execution of the Nipani Water Supply Scheme is expected to be spread over a period of 3 years. Therefore, this sub-division, together with the staff proposed therefor, will have to be maintained for a period of 3 years. During this period, the expenditure on the sub-divisional establishment, Tools and Plant and contingencies, etc., is not expected to be more than Rs.1,25,000/-.

4. It will thus be seen that the centage charges earned by the sub-division more than counter balance the expenditure incurred thereon. The urgency or importance of taking these in hand immediately need not be reiterated. It is clearly evinced in the anxiety of the local bodies coming forward to finance the schemes. The Nipani municipality has already deposited with me a sum of Rs. 1 lakh for execution of their water supply scheme.

Subject:- Nipani Water Supply Scheme.

No. 164 of 1950/51,
Office of the Municipal Borough,
Nipani 2nd May 1950.

To

The Hon'ble Minister for
Public Works Department, Govt. of Bombay,
BOMBAY.

Sir,

Nipani is a Municipal Town in Chikodi Taluka of Belgaum District and is situated on the Poona-Bangalore Road 25 miles -- South-West of Kolhapur. The Town is one of the well known centres of trade in Belgaum District.

The present sources of drinking water supply of the town are two big wells which are situated in Shirguppi a village about two miles away from the town of Nipani and the average supply of Water comes to 4 gallons per head per day. Thus the water supply of the town being too inadequate to meet the requirements of the public in matter of drinking water, scarcity of water is being felt most. The pinch is felt more so particularly in hot season when - the sources of Water supply as well as wells round about the town go well neigh dry. With the increase in the population which has now gone to about 22000 souls, the demands of the public in t h e matter of water have increased and so the scarcity of water is - getting more and more acute day by day.

The Municipality with a view to augment the Water supply and thus to remove the grievence of the public in the matter of Water supply, permanently , approached the Public Health Engineer to Government of Bombay, in 1936 for preparing a Water Supply -- Scheme for the Municipality. The Public Health Engineer suggested a Scheme of constructing a Dam ~~over~~ accross the Nalla passing -- nearby. The Municipality agreed to the Scheme and got prepared in 1941 the Scheme estimating to cost Rs. 3,57,934/- gross. The -- Scheme has been revised twice and now it has both been Administra--tively approved and Techenically sanctioned by Government. On receipt of sanction the Municipality paid on 9-1-1950 Rs. 1 lack as first instalment as instructed by the Public Health Engineer to Government and requested the Public Health Engineer to start

start the Works immediately in view of its urgency. But the Public Health Engineer under his No. 4502 of 23-4-50 has informed the Municipality that the Government in Public Works Department has informed him that the Sub-Division which was proposed to be opened at Nipani for executing the Nipani Water Works should not be opened till 1951-52 and thus the execution of the Scheme is likely to be delayed. As the scarcity of Water is getting more and more acute day by day the people are clamouring against the scarcity and raising hue and cry against the Municipality particularly in view of the fact that the Municipality have raised taxation twice since long mainly for the purpose of carrying out the proposed Water Supply Scheme. So immediate execution of the Scheme has become urgent. Any more delay in the execution of the Scheme is very likely to create unrest among the public who are awaiting since long the execution of the Scheme and whose patience have nearly exchausted in the matter.

Under the circumstances, I request that your honour will be good enough to sanction the Sub-Division at Nipani so as to start the works immediately.

Yours Faithfully,

President,
Municipal Borough Nipani.

Subject:- Nipani Water Supply Scheme.

No.164 of 1950/51.
Office of the Municipal Bo
Nipani, 2nd May 1950.

To

The Hon'ble Minister for
Public Works Department,
Government of Bombay, Bombay.

Sir,

Nipani is a Municipal Town in Chikodi Taluka of Belgaum District and is situated on the Pooha-Bangalore Road 25 miles South-West of Kolhapur. The Town is one of the well known centres of trade in Belgaum District.

The present sources of drinking water supply of the town are two big wells which are situated in Shirguppi a village about two miles away from the town of Nipani and the average supply of water comes to 4 gallons per head per day. Thus the water supply of thetown being too inadequate to meet the requirements of the public in matter of drinking water, scarcity of water is being felt most. The pinch is felt more so particularly in hot season when the sources of water supply as well as wells round about the town go wel-neigh dry. With the increase in the population which has now gone to about 22000 souls, the demands of the -- public in the matter of water have increased and so the scarcity of water is getting more and more acute day by day.

The Municipality with a view to augment the water supply ans thus to remove the grievance of the public in the matter of water supply, permanently, approached the Public Health Engineer to Government of Bombay, in 1936 for -- preparing a Water Supply Scheme for the Municipality. The Public Health Engineer suggested a Scheme of constructing a Dam accross the Nalla passing nearby. The Municipality agreed to the Scheme and got prepared in 1941 the Scheme estimating to cost Rs.3,57,934/- gross. The Scheme has been revised twice and now it has both been Administratively approved and Techenically

sanctioned by Government. On receipt of sanction the Municipality paid on 9-1-1950 Rs. 1 lack as first instalment as instructed by the Public Health Engineer to Government and requested the Public Health Engineer to start the works -- immediately-in view of its urgency. But the Public Health Engineer under his No. 4502 of 23-4-50 has informed the Municipality that the Government in Public Works Department has informed him that the Sub-Division which was proposed to be opened at Nipani for executing the Nipani Water Works should not be opened till 1951-52 and thus the execution of the Scheme is likely to be delayed. As the scarcity of Water is getting more and more acute day by day the people are clamouring against the scarcity and rainsing hue and cry against the Municipality particularly in view if the fact that the Municipality have raised taxation twice since long mainly for the purpose of carrying out the proposed Water Supply Scheme. So immediate execution of the Scheme has become uregnt. Any more delay in the execution of the scheme is very likely to create unrest among the public who are awaiting since long the execution of the Scheme and whose patience have nearly exhausted in the matter.

Under the circumstances, I request that your honour will be good enough to sanction the Sub-Division at Nipani so as to start the works immediately.

Yours faithfully,

Sd/-

President,
Municipal Borough Nipani.
